

REMARKS

Support for new Claim 9 is found at page 9, three lines from the bottom of the page.

Support for new Claim 10 is found at page 9, the last two lines at the bottom of the page.

Support for new Claim 11 is found in the last line of page 9 and the first line of page 10.

Support for new Claim 12 is found at page 10 last two lines.

Support for new Claim 13 is found at page 11 lines 11 to 14.

Support for new Claim 14 is found at page 11 last line to page 12 line 1.

Support for new Claim 15 is found at page 12 lines 7 to 8

Support for new Claim 16 is found at page 12 lines 9 to 10.

Support for new Claim 17 is found at page 12 lines 12 to 14.

Support for new Claim 18 is found at page 12 lines 15 to 17.

Support for new Claim 19 is found at 18 to 20.

Support for new Claim 20 is found at page 12 last three lines from the bottom of the page.

The claims have otherwise been amended to meet the rejections raised under 35 USC 112. In particular it has been made clear that the starting material for the process can be fresh pulp from either mature or immature fruit or can be dry powdered pulp from either mature or immature fruit. It has also been made clear that the miscella of claim 1 step c can be produced either by direct extraction with a halogenated solvent or by a two step process using first an alcoholic extraction and then separation into a halogenated solvent.

So far as the term "ambient temperature" is concerned, this simply means that no special heating or cooling steps are taken.

Antecedent basis has been provided where required for other terms commented on by the examiner.

In view of the foregoing, it is submitted that this application is now in order for allowance and an early action to this end is respectfully solicited.

Respectfully submitted,

JOHN RICHARDS
